Extraordinary Ability -> Description: You must be able to demonstrate extraordinary ability in the **sciences**, arts, education, business, or athletics through sustained national or international acclaim.

Extraordinary Ability -> Evidence: You must meet at least 3 of the 10 criteria* below, or provide evidence of a one-time achievement (i.e., Pulitzer, Oscar, Olympic Medal) as well as evidence showing that you will be continuing to work in the area of your expertise. **No offer of employment or labor certification is required (but Beneficiary has - Statement of Beneficiary on Work Plans in the United States - My useful ideas of IT and Web projects for the United States of America).**

---

* Criteria for Demonstrating Extraordinary Ability

In order to demonstrate you have sustained national or international acclaim and that your achievements have been recognized in your field of expertise, you must either include evidence of a one-time achievement (major internationally-recognized award) or 3 of the 10 listed criteria below (or comparable evidence if any of the criteria do not readily apply):

1. Evidence of receipt of lesser nationally or internationally recognized prizes or awards for excellence;
2. Evidence of your membership in associations in the field which demand outstanding achievement of their members;
3. Evidence of published material about you in professional or major trade publications or other major media;
4. Evidence that you have been asked to judge the work of others, either individually or on a panel;
5. Evidence of your original scientific, scholarly, artistic, athletic, or business-related contributions of major significance to the field;
6. Evidence of your authorship of scholarly articles in professional or major trade publications or other major media;
7. Evidence that your work has been displayed at artistic exhibitions or showcases;
8. Evidence of your performance of a leading or critical role in distinguished organizations;
9. Evidence that you command a high salary or other significantly high remuneration in relation to others in the field;
10. Evidence of your commercial successes in the performing arts;

Dear Immigration Officer:

The following evidence is respectfully submitted in support of **Mr. Vladislav Gurabanidze (scientist)** petition for classification as a qualified immigrant under the preference of aliens with extraordinary ability. This evidence will specifically demonstrate that **Mr. Vladislav Gurabanidze** qualifies for the classification under Section 203(b)(1)(A) of the Immigration and Nationality Act [8 U.S.C. 1153] as an alien with extraordinary ability due to the following reasons:

Part 1) Mr. Vladislav Gurabanidze possesses extraordinary ability in **science**, specifically in **IT/Web (Web Developer, Web Designer [Soc code: 15-1250, Software and Web Developers, Programmers])**, which has been demonstrated by sustained national and international acclaim and his achievements have been recognized in the field through extensive documentation. (Please refer to **Section 1.**)

Part 2) Mr. Vladislav Gurabanidze has a level of expertise indicating that he is one of that small percentage who has risen to the very top of the **science [computer science] (specifically in IT/Web (Web Developer, Web Designer [Soc code: 15-1250, Software and Web Developers, Programmers])**. (Please refer to **Sections 1 [A], Sections 1 [B], Sections 1 [C]**.)

Part 3) Mr. Vladislav Gurabanidze provides evidence that he satisfies **9 [nine] (i, ii, iii, v, vi, vii, viii, ix, x) (1, 2, 3, 5, 6, 7, 8, 9, 10)** of ten (10) criteria listed in 8 CFR, Section 204.5(h)(3), namely:

(Part 3.1) Documentation of **Mr. Vladislav Gurabanidze** receipt of national and internationally recognized prizes and awards for excellence in the field of endeavor. (1. Evidence of receipt of lesser nationally or internationally recognized prizes or awards for excellence). (Please refer to **Section 1[1]**.)

(Part 3.2) Documentary evidence of **Mr. Vladislav Gurabanidze** membership in major associations. (2. Evidence of your membership in associations in the field which demand outstanding achievement of their members). (Please refer to **Section 1[2]**.)

(Part 3.3) Evidence of published material about **Mr. Vladislav Gurabanidze** in major trade publications and other major media. (journal, newspapers, websites, TV and etc.). (3. Evidence of published material about you in professional or major trade publications or other major media). (Please refer to **Section 1[3]**.)

(Part 3.4) – N/A;

(Part 3.5) Evidence of the original contribution of **Mr. Vladislav Gurabanidze** of great importance to the science (Computer science, IT, Web, E-commerce). (5. Evidence of your original scientific, scholarly, artistic, athletic, or business-related contributions of major significance to the field). (Please refer to **Section 1[5]**.)

(Part 3.6) Evidence of **Mr. Vladislav Gurabanidze** authorship of scholarly articles in the field in professional media. (6. Evidence of your authorship of scholarly articles in professional or major trade publications or other major media). (Please refer to **Section 1[6]**.)

(Part 3.7) Evidence of **Mr. Vladislav Gurabanidze** work (web projects, web design) has been displayed at artistic exhibitions or showcases. (7. Evidence that your work has been displayed at artistic exhibitions or showcases). (Please refer to **Section 1[7]**.)

(Part 3.8) Evidence of **Mr. Vladislav Gurabanidze** had (or/and) has performance of a leading or critical role in distinguished organizations. (8. Evidence of your performance of a leading or critical role in distinguished organizations). (Please refer to **Section 1[8]**.)

(Part 3.9) Evidence of **Mr. Vladislav Gurabanidze** had (or/and) has command a high salary or other significantly high remuneration in relation to others in the field. (9. Evidence that you command a high salary or other significantly high remuneration in relation to others in the field). (Please refer to **Section 1[9]**.)

(Part 3.10) Evidence of **Mr. Vladislav Gurabanidze** had (or/and) has commercial successes in the performing arts. (10. Evidence of your commercial successes in the performing arts). (Please refer to **Section 1[10]**.)

Part 4) **Mr. Vladislav Gurabanidze** work will substantially benefit prospectively the United States. (Please refer to **Section 2**)

Part 5) In the United States, **Mr. Vladislav Gurabanidze** plans to continue work in the area of **science [computer science] (specifically in IT/Web (Web Developer, Web Designer [Soc code: 15-1250, Software and Web Developers, Programmers])**. (Please refer to the **Statement of Beneficiary on Work Plans in the United States (My useful ideas of IT and Web projects for the United States of America)**).

Pursuant to 8 CFR, Section 204.5(h)(1), **Mr. Vladislav Gurabanidze** may file an I-140 visa petition for classification under Section 203(b)(1)(A) of the Act as an alien of extraordinary ability on his own behalf.

Pursuant to 8 CFR, Section 204.5(h)(5), neither an offer for employment in the United States nor a labor certification is required for this classification.

Mr. Vladislav Gurabanidze

Section 1.

Mr. Vladislav Gurabanidze is an alien of extraordinary ability in **science [computer science] (specifically in IT/Web (Web Developer, Web Designer [Soc code: 15-1250, Software and Web Developers, Programmers])**, which has been demonstrated by sustained national and international acclaim (also great contributions to this science). **Mr. Vladislav Gurabanidze** achievements are extensively documented.

Section 1 [A]. **Mr. Vladislav Gurabanidze** is an expert in the field of **Information Technology (IT) / Web / Programming / Computer science** with **over 20 years** of work experience in the exact area of proposed employment.

(Please see **exhibit 1**, CV/Resume of Vladislav Gurabanidze), see web URL, click here:
http://makler24.ge/doc/3/0.vladislav_gurabanidze_eng.pdf

Vladislav worked with complex and leading web projects for the President of Georgia (when he was 22 years old), the Prime Minister of Georgia, the Government of Georgia, the US Embassy in Georgia, companies outside Georgia, companies in the UK, collaborated with well-known companies and organizations.

Many times he had interviews in TV, press, newspaper about his leading role in the web industry.

He worked in large and well-known companies. He received awards, prizes, diplomas and commendations. His role in the web industry is very high, he has reached great heights in the field of information technology and computer science, he has shown that he can solve complex problems and is always attracted to well-known companies and organizations.

He has a creative mind that can come up with new creative ideas in the IT and web industry.

Irakli Tkemaladze work/worked in U.S. Department of State (U.S. Embassy in Georgia) (position: Web master), Flash Design Studio, web site: www.flash.ge (position: Art Director / Founder), Georgian Public Broadcasting (GPB), web site: www.1tv.ge (position: Web master), Saatec LLC, web site: www.saatec.com (position: Web master).

Irakli Tkemaladze confirms that Vladislav Gurabanidze has made and will make a significant contribution to science and he had and has performance of a leading or critical role in distinguished organizations and companies, he says the following:

We have cooperated on numerous projects with Vladislav Gurabanidze, who has significantly contributed to our company with his knowledge, responsibility and demonstrated himself as hardworking and outstanding employee. Vladislav is exemplary IT professional who helped us grow younger generations and assisted them in becoming professionals. I am personally sure that with his background and knowledge in IT industry Vladislav will benefit and move forward any company that he will work for as he did at Flash Studio.

Niko (Nika) Gogoladze is founder of CGroup. CGroup (Web Development Company) Website: www.cgroup.ge , www.turebi.ge , https://www.youtube.com/watch?v=M6DIuYHVmYU

Niko (Nika) Gogoladze confirms that Vladislav Gurabanidze has made and will make a significant contribution to science and he had and has performance of a leading or critical role in distinguished organizations and companies, he says the following:

Vladislav Gurabanidze is a highly qualified professional. He has contributed greatly to the development of web technologies in Georgia and abroad. Too many web specialists would like to work with him as he has total creative ideas and can come up with these ideas and bring them to an end. It is from this experience that I can judge that Vladislav Gurabanidze is an exemplary professional who will make a significant contribution to the American web technology. I think he will use his vast experience and do a lot of useful web projects for America. Is a very honest and decent person.

Shalva Kavtaradze is Front end developer on Adjarabet, web site: www.adjarabet.com (and Toptal - Freelance Toptal UI Developer, web site: www.toptal.com)

Shalva Kavtaradze confirms that Vladislav Gurabanidze has made and will make a significant contribution to science and he had and has performance of a leading or critical role in distinguished organizations and companies, he says the following:

Vladislav Gurabanidze is a great specialist and professional in his field, he made a great contribution to the development of web technologies in Georgia. Too many web specialists would like to work with him, he is a talented person and also very hardworking. I think this will make a significant contribution to the American web technology. He will use his talent and potential to create many good and useful web projects.

The National Internet Competition 2007 started
David Mchedlidze
Source: http://www.topsite.ge/
According to the organizers of the competition, there will be nothing left on the Georgian Internet soon except sites equipped with illegal music, movies and pornographic content. Georgian Internet is on the verge of extinction.

"National Internet Competition 2007" aims to improve this much worse situation.

The world internet is already at a new stage, with new conceptual technologies called Goes to WEB 2.0, while in Georgia the so-called pirated. "Varezuli" sites boom, say the organizers of the competition - the newspaper "Navigator" and "ITDC".

The main goal of the competition is to stimulate the creation of interesting and useful Georgian websites, online stores, blogs, social networks, children's and educational Internet resources.

This year's competition marathon started on June 26 and will end on September 26. Applications close on September 19th. Every person or group who has decided to create a site with an unfinished internet project or even at the idea level is given the opportunity to refine their own site and participate in the competition. Only Georgian sites created in 2006-2007 will be able to participate in the competition.

"Pirate" sites with illegal content will not be allowed to participate in the contest.

The competition is held in 8 categories, with solid cash prizes. In addition, in a separate nomination, the general sponsor of the competition, Magti, a cellular communication company, awards a prize for creating a Bali student website and image site in Bali.

In total, the prize fund is more than 7 thousand US dollars.

For more information about the competition, visit the website: http://www.topsite.ge/

(Please see **exhibit 8**, Information about National Internet Contest, publication title: The National Internet Competition 2007 started, Web URL: http://www.media.ge/ge/portal/events/104522/);

See evidence: He was accepted into the organization for his high achievements. Not everyone can become a member of the organization. See letter (Email letter) - (Please see **exhibit 26**);

Scientific Cyber Security Association actively works on both Georgian and international scientific projects. It actively cooperates with foreign experts.

Cooperation is being held not only with concrete scientists but also with organizations, the clear example of it is the cooperation with one of the largest universities in Ukraine – Taras Shevchenko Kiev National University. Besides of many conferences, a joint scientific journal was issued with the above mentioned institution; Polish Technical Academy is also involved into the recruitment and development of the journal.

Section 1.2.8)

Vladislav Gurabanidze is member of Estonian card.

- (Please see **exhibit 27**);

He was accepted into the organization for his high achievements. Not everyone can become a member of the organization. See url: https://e-estonia.com/solutions/e-identity/e-residency/

https://en.wikipedia.org/wiki/E-Residency_of_Estonia

- (Please see **exhibit 28**);

Vladislav Gurabanidze was accepted into the organization for his high achievements. Not everyone can become a member of the organization.

See link: https://e-estonia.com/solutions/e-identity/e-residency/

See link 2: https://en.wikipedia.org/wiki/E-Residency_of_Estonia

Information:

e-Residency of Estonia (also called virtual residency or E-residency) is a program launched by Estonia on 1 December 2014. The program allows non-Estonians access to Estonian services such as company formation, banking, payment processing, and taxation. The program gives the e-resident a smart card which they can use to sign documents. The program is aimed towards location-independent entrepreneurs such as software developers and writers. The first e-resident of Estonia was British journalist Edward Lucas; the first person to apply for and be granted e-residency through the standard process was Hamid Tahsildoost from the United States.

An application for e-residency can be made online by filling in a form, supplying a scan of a national passport and a photograph, and giving the reason for applying (which does not strongly affect the outcome of the application). Kaspar Korjus, former managing director of the e-residency program, said that applicants who had been involved in financial misbehaviour such as money laundering would be rejected. Successful applicants would be invited to an interview in Tallinn or an Estonian embassy about three months after applying, and would then, if successful, be issued with their card. The certificates of the document are valid for five years, up from three years when the program was first announced. After that period, if a person wishes to continue using e-services, they have to apply for a new document. The application process will be the same as when they first applied. A state fee needs to be paid again when they submit a new application.

Section 1 [3]. Evidence of published material about **Mr. Vladislav Gurabanidze** in major trade publications and other major media. (journal, newspapers, websites, TV and etc.). (3. Evidence of published material about you in professional or major trade publications or other major media).

Imedi TV was founded in 2001 and has been broadcasting since March 15, 2003.

For the first time in Georgian TV space, Imedi TV started showing licensed products. The news is covered operatively and objectively by the viewers throughout the day. In addition to news, we offer viewers adapted versions of world-famous television formats, Georgian and foreign feature films, TV series, documentaries and animated films, as well as live broadcasts of world-famous movies, music and other awards ceremonies.

We refuse to broadcast unlicensed productions on television and believe that it is in the interests of the TV station to establish legal relationships with suppliers of leading video, music and film productions.

We are constantly monitoring and taking into account the current needs of the television industry, the dynamic development of events and the ordering of the public, and we are in the process of constant updating and searching.

Our goal is to spread the TV signal almost all over Georgia and create interesting content for the widest possible audience, as well as to maintain the high quality of the presented products, and to establish long-term partnerships with our suppliers and existing and potential customers.
Radio Imedi first aired on 105.9 FM in December 2001 in Tbilisi. Since December 2003 "Radio Imedi" has broadcast 24 hours a day across all the settled territory in Georgia.

The Georgian National Communications Commission (GNCC) suspended Imedi TV's broadcast license for a three-month period, citing violation of law on broadcasting by the television station. The GNCC says in its decision that on November 7, Imedi TV reported "an obvious disinformation that law enforcement officers were planning to storm cathedral of Holy Trinity... This report has created an imminent and real threat of overgrowing riots into large-scale massive unrests, which could eventually led to uncontrollable processes." Georgian officials further accused Patarkatsishvili of controlling the Imedi TV's editorial policy and using it for inciting unrests. As a proof for their allegations, Georgia's General Prosecutor's Office released, on November 16, 2007, several taped phone conversations between Patarkatsishvili and Giorgi Targamadze, chief of Imedi

TV's political programs, and also between a producer and a journalist of Imedi TV. The government's closure of the station and the handling of the demonstration were criticised by the West.

Imedi resumed broadcast on September 2008. It's new director general, Giorgi Arveladze was very close to government, so Imedi became pro-govermental TV station among with Rustavi 2 and Georgian Public Broadcasting. Imedi was in scandal on March 2010, when it broadcast news hoax. After this disinformation, 3 people were died. After this, Imedi's trust was decreased.

On October 16, 2012, 15 Days after 2012 Georgian parliamentary election, Imedi was returned to Patarkatsishvili family. After this, Imedi became Independent TV station again.

On August 30, 2015, Imedi canceled popular talk shows "Reaction" and "Imedi's Week", hosted by popular anchorwoman Inga Grigolia. Soon, Imedi became pro-govermental again.

On 2021, Imedi was bought by "Hunnewell Partners" company.

Transcription (translation from Georgian into English)

Video time: 21:01

Journalist: The web page has competitors. Website geo-jobs.com it has been working for 2 years. Website management wants to recruit a large number of users with the help of innovative services.

Vladislav Gurabanidze: The positive side of our web portal is that the user can post vacancies and resumes on our web portal. On our web portal there are a lot of forms for filling out different companies, as well as many forms for filling out from banks.

Journalist: The registration of these persons who are looking for work costs only GEL 15 - 1 year. With the help of a low service rate, this website and the company want to develop in the Georgian Internet market. Today, the profit does not increase - 800 lari.

Journalist (Akaki Gogichaishvili) - There was this news for today. Tomorrow you will learn the news about how the local leasing market is developing.

OTHER VIDEO: Rustavi 2 TV - Business Courier about Vladislav Gurabanidze web project. Dated: 23-Jan-2008. Author: Akaki Gogichaishvili. Please see archive video, from time: 21:01. Click here:

https://rustavi2.ge/en/shows/bizneskurieri

Rustavi 2 first aired "Business Courier" in 2006. The program offered in-depth reporting and critical analysis of major business issues with an emphasis on current events, business development, market outlooks, and emerging opportunities.

Producers of the program were the first to see the readiness and will of Georgian society to join in the economical process, try for their own business and achieve financial independence and freedom.

"Business Courier" producers considered business in Georgia was not any more sphere only for a particular exclusive circle, it was supposed to be understood by all; energetic and talented people could profit and succeed in it. This was the main reason why business news were presented in the most comprehensive and interesting way.

Business Courier had three main goals:

to show the business environment, point on the possible changes and advise the best business strategy to the informed audience;

to help viewers understand the day ahead, to explain the situation, show prospects in business, what is needed to begin own business and when to expect profit from it;

to explain the economical policy of the government and its possible results; to show government current problems of the business world and suggest reforms needed to solve them.

Program featured a guest who offered perspective on economic issues, investment strategies, trends and analysis of the day's news.

Business Courier was a program for everyone - viewers of different professions and ages got numerous ideas for improving their life, achieving their potential, benefiting from education and experience, earning and spending money.

Founded in 1994, Rustavi 2 is the most popular and successful broadcasting company in Georgia. Rustavi 2 is a privately owned. Information about its shareholders see in the following compliance form. Rustavi 2 is free-to-air terrestrial broadcaster network that currently reaches 85% of Georgia's population nationwide. **RATING: OVER 2 MILIONS;**

Pages of peer-reviewed publication in journal "Sibac" authored by Vladislav Gurabanidze and translation of abstracts into English if it is necessary.

ISSN 2542-0011

Journal indexed in SCOPUS, VAK, RSCI (RINC).

The journal is included in the List of the leading reviewed scientific journals and editions (approved by the Higher Attestation Commission (VAK) by the Russian Ministry of Education and Science) published in the Russian Federation, which should contain the essential scientific results of theses of the authors pursuing degrees of candidate and doctor of sciences.

Russian Science Citation Index (Russian: RINC) is a bibliographic database of scientific publications in Russian. It accumulates more than 13 million publications of Russian authors, as well as information about citing these publications from more than 5000 Russian journals. The Russian Science Citation Index has been developed since 2005 by the Scientific Electronic Library eLIBRARY.RU. The information-analytical system Science Index is

a search engine of this database; it offers a wide range of services for authors, research institutions and scientific publishers. It is designed not only for operational search for relevant bibliographic information, but is also as a powerful tool to assess the impact and effectiveness of research organizations, scientists, and the level of scientific journals, etc.

The papers written in the Russian language are followed by an abstract and keywords in English. At the same time, every article or study written in one of the international languages (English) is followed by an abstract and keywords in English and Russian.

Vladislav Gurabanidze has been published in "Sibac" journal with peer-reviewed paper «OLD WEB TECHNOLOGIES AND PROGRAMMING LANGUAGES» in 18 May 2021.
The compilation will be published on the website https://sibac.info (dated: 18 May 2021).

Novosibirsk city, 2021

Scientific publishing house "Sibac" specializes in scientific consulting, publishing scientific journals and holding conferences. We help scientists publish their articles in the Russian editions of VAK, RSCI (RINC), eLIBRARY.

We select an individual solution for articles of any complexity. We help authors prepare articles for publication; bring them in line with the requirements of publications of any level (RSCI, HAC-VAK). We are working on the selection of the required journal and are negotiating the publication with the appropriate publication.

AMERICAN CORNERS
Bringing America to Georgia
American Corners are small, American-style community centers located in libraries and other public spaces.
They operate through joint partnerships to promote cooperation and understanding between the people of

the United States and Georgia by providing accurate information about the U.S. Access to American Corners and their collections are free and open to all interested Georgians of all ages.

Major programs and regular activities at all American Corners include American speakers, American movie screenings, English language classes, storytelling and book clubs, debate and discussion clubs, MakerSpace activities and U.S. holiday celebrations.

American Corners offer important learning, collaboration, and communication resources, such as books, films, games, MakerSpace equipment including 3D printers, and internet access.

How can we benefit from the Corners?

Improve your English language skills;
Learn about opportunities to study at universities in the U.S.;
Expand your knowledge of leadership and entrepreneurship;
Attend interesting public programs in English and Georgian languages;
Explore American holidays and traditions;
Learn about American society and democratic values;
Get hands-on experience using modern technologies;
Access more than 6,000 books covering a range of topics and 500+ audio and video materials;
Play over 30 games designed for people of different ages;
Use these resources to develop your own ideas and projects; and
Make friends and meet like-minded people.

Transcription (translation from Georgian into English)

Video time: 21:01

Journalist: The web page has competitors. Website geo-jobs.com it has been working for 2 years. Website management wants to recruit a large number of users with the help of innovative services.

Vladislav Gurabanidze: The positive side of our web portal is that the user can post vacancies and resumes on our web portal. On our web portal there are a lot of forms for filling out different companies, as well as many forms for filling out from banks.

Journalist: The registration of these persons who are looking for work costs only GEL 15 - 1 year. With the help of a low service rate, this website and the company want to develop in the Georgian Internet market. Today, the profit does not increase - 800 lari.

Journalist (Akaki Gogichaishvili) - There was this news for today. Tomorrow you will learn the news about how the local leasing market is developing.

OTHER VIDEO: Rustavi 2 TV - Business Courier about Vladislav Gurabanidze web project. Dated: 23-Jan-2008. Author: Akaki Gogichaishvili. Please see archive video, from time: 21:01. Click here: https://www.youtube.com/watch?v=0kiRz8PLe-E&t=1261s

https://rustavi2.ge/en/shows/bizneskurieri

Rustavi 2 first aired "Business Courier" in 2006. The program offered in-depth reporting and critical analysis of major business issues with an emphasis on current events, business development, market outlooks, and emerging opportunities.

Producers of the program were the first to see the readiness and will of Georgian society to join in the economical process, try for their own business and achieve financial independence and freedom.

"Business Courier" producers considered business in Georgia was not any more sphere only for a particular exclusive circle, it was supposed to be understood by all; energetic and talented people could profit and succeed in it. This was the main reason why business news were presented in the most comprehensive and interesting way.

Business Courier had three main goals:

to show the business environment, point on the possible changes and advise the best business strategy to the informed audience;

to help viewers understand the day ahead, to explain the situation, show prospects in business, what is needed to begin own business and when to expect profit from it;

to explain the economical policy of the government and its possible results; to show government current problems of the business world and suggest reforms needed to solve them.

Program featured a guest who offered perspective on economic issues, investment strategies, trends and analysis of the day's news.

Business Courier was a program for everyone - viewers of different professions and ages got numerous ideas for improving their life, achieving their potential, benefiting from education and experience, earning and spending money.

Founded in 1994, Rustavi 2 is the most popular and successful broadcasting company in Georgia. Rustavi 2 is a privately owned. Information about its shareholders see in the following compliance form. Rustavi 2 is free-to-air terrestrial broadcaster network that currently reaches 85% of Georgia's population nationwide. **RATING: OVER 2 MILIONS;**

A web specialist is specifically a webmaster. The profession of a webmaster includes the profession of a web programmer (Front-End Developer, Back-End Developer, Full Stack Developer, Web Developer) who creates programs, who writes code in a programming language, and also the profession of a web designer who creates graphic design for websites. Besides the fact that Vladislav Gurabanidze is a web programmer, he is also a web designer - he is a web specialist. He also created many web designs for websites, he made an exhibition of web designs that he created in the course of his work.

Section 1.7.2)

The U.S. Embassy in Georgia, Tbilisi cooperated with me (Vladislav Gurabanidze) and ordered me to create a www.americancorners.ge web project (2008 year).
I created the web project www.americancorners.ge for The U.S. Embassy in Georgia.

When I created the web project www.americancorners.ge , I had was invited to The U.S. Embassy in Georgia (2008 year), Tbilisi, I made a presentation (show, exhibition of web site) of this project and after showing this project, I conducted a training session for the employees of this project, I taught them how to use the control panel (CMS) of this web projects.
The employees came from different regions.

I found on the Internet one of the employees who worked in the American Corners / Batumi city, she can confirm that I did web project's presentation and after I did American Corners's of Georgia employees instructing (Web site CMS) in The U.S. Embassy in Georgia, Tbilisi.

Below I will write her details and contact information. She will confirm my information (call [english] or send email):
She worked in the American Corners / Batumi city

- (Please see **exhibit 37A**);

A web specialist is specifically a webmaster. The profession of a webmaster includes the profession of a web

programmer (Front-End Developer, Back-End Developer, Full Stack Developer, Web Developer) who creates programs, who writes code in a programming language, and also the profession of a web designer who creates graphic design for websites. Besides the fact that Vladislav Gurabanidze is a web programmer, he is also a web designer - he is a web specialist (web programmer and web designer). He also created many web designs for websites, he made an exhibition of web designs that he created in the course of his work.

Section 1.10.2)
See Section 1.8.1) and See Section 1.7.2)

The U.S. Embassy in Georgia, Tbilisi cooperated with me (Vladislav Gurabanidze) and ordered me to create a www.americancorners.ge web project (2008 year).
I created the web project www.americancorners.ge for The U.S. Embassy in Georgia.

When I created the web project www.americancorners.ge , I had was invited to The U.S. Embassy in Georgia (2008 year), Tbilisi, I made a presentation (show, exhibition of web site) of this project and after showing this project, I conducted a training session for the employees of this project, I taught them how to use the control panel (CMS) of this web projects.
The employees came from different regions.

I found on the Internet one of the employees who worked in the American Corners / Batumi city, she can confirm that I did web project's presentation and after I did American Corners's of Georgia employees instructing (Web site CMS) in The U.S. Embassy in Georgia, Tbilisi.

Below I will write her details and contact information. She will confirm my information (call [english] or send email):
She worked in the American Corners / Batumi city
Given name, surname: **Shorena Dolaberidze**
Personal number: 61001024450

Section 2. **Mr. Vladislav Gurabanidze**'s proposed employment is in an area of substantial intrinsic merit that will ultimately benefit the United States. The proposed employment is exactly in accord with **Mr. Vladislav Gurabanidze**'s field of recognition.

Section 2 [1]. IT/Web/Computer science is an area of intrinsic merit.

Mr. Vladislav Gurabanidze Useful Projects/Works for the United States of America

   1) - Project.
   We want to create a mobile application that will facilitate ordering food in restaurants in the United States.
   People will install the application on their mobile phones and come to a restaurant. In the restaurant, there will be a QR code on the tables, it will scan the QR code on the table and the restaurant menu will open in the mobile application.
   The person will select the type of food, quantity and pay the cost of the food (or split the payment with friends) using a credit card and place an order for food. It is necessary to add a creative function of payment to order by several clients, for example - five friends came to a restaurant, ordered food for 150 USD, there should be a function that divides the amount by 5 people and each pay 30 USD via a mobile application.
   When the restaurant receives the order, it will place the order and bring it to the client. The client does not have to call the waiter; the restaurant client can read in detail the information about the food / dish that he/she orders - the description, the number of calories, photos, videos, ingredients of the dish and reviews from other customers.
   The client can also place an order before arriving at the restaurant, book a table, pay for the order and indicate the time when he/she will come to the restaurant. Also, the person will turn on the function through which see online how his/her ordered dish is being prepared.

[1) – Project] Conclusion: 1) – Project

This project will be of great benefit to the US, as there is no such service in the US. It will be very convenient for the customers. This program will be installed and used by many US customers. The project contains an innovative idea - everyone can pay for themselves in a restaurant, they can also see how their food is prepared. The development of this mobile application will require a new workforce - workers in the United States. It helps create new jobs in the United States. Besides the fact that it meets the criterion of substantial merit and national importance, the project will be profitable and new jobs in the United States will be created.

The program will be updated and improved. It will bring more profits and more jobs in the US, and we will pay taxes to the US treasury.

It's no secret that the most advanced country in the IT and Web industry is the United States. Examples of this are innovative ideas and websites like amazon.com, paypay.com, youtube.com and others. Also, this program will improve the US economy, as it will bring profit and new jobs.

The innovation is that you can distribute the amount of the check between the restaurant visitors at the same table and they will also have the opportunity to see how their food is being prepared. Many innovative projects have not yet been implemented in the United States. This is an innovative project.

This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clauses:
Improving the U.S. economy (as it will be profitable for the USA);
Improving wages and working conditions of U.S. workers (it creates new jobs with improved conditions);
www.amazon.com, www.paypay.com, www.youtube.com, www.google.com – these are the most advanced and largest mega IT companies in the United States.

2) - Project.
I created a web project (Real estate - buy, sale, rent): **www.makler24.ge**
Web site: **http://makler24.ge/eng-cat-all-type-0-stype-0-page-1.html**
I want to create a similar web portal (USA real estate website, rent, buy and sell) in the USA.
My creative idea is that I want to add a function to the site - viewing real estate videos. There are a lot of photos on similar sites, but no real estate videos.
The client cannot see in detail how the rooms and the courtyard are located, with the video he/she will receive full information, he/she will be able to add many videos to the site, for example, as on my site YouTube video: http://makler24.ge/eng-cat-all-detail-1-info-1-id-116.html
There are also 3D photos, I want to add 3D photos to the site (you can look left, right, up and down in the room and move around the room). The 3D photo will show in detail the rooms and the yard of the property, the client will be able to walk around the house virtually online and view the property.

[2] – Project] Conclusion: 2) – Project

The applicant already has this web portal ready, check the website: **www.makler24.ge** , he also wants to launch it in the USA. With this web portal in the USA it will be possible to buy, sell, rent housing in the USA.

You can add a section to the website - Affordable Housing for US Citizens with a Discount. This corresponds to the criterion (The proposed endeavor has both substantial merit and national importance) and its clause - Providing affordable housing in the USA.

The web portal also has a new innovative idea - web site visitors will be able to see a dwelling, apartment, house in video or 3D format, walk and watch the apartment from room to room virtually. Real estate agencies, brokers and website visitors will be able to sell, rent their homes through this web portal.

This project meets the criterion (The proposed endeavor has both substantial merit and national importance);
and its clauses: Improving the U.S. economy (as it will be profitable for the USA);
Improving wages and working conditions of U.S. workers (it creates new jobs with improved conditions); Providing affordable housing in the USA;
This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will

create new jobs in the United States.

3) - Project.

I have created a web portal - selling fruits, vegetables and berries online: **www.fruitonline.ge**

I want to implement this web portal in America so that customers can buy fruits, vegetables and berries using the website. I want to integrate fruit and vegetable stores into this system so that the client can buy fruits, vegetables and berries using the website and mobile application.

The client will order fruits, vegetables and berries using the website and then, within a certain time, he/she will be delivered home the order - fruits, vegetables and berries. There will also be baskets of fruits.

The clients will be able to choose a basket of beautiful fruits and give, for example, to their loved ones - a girlfriend, parents or others, make them an edible and beautiful gift.

On the site selling fruits, vegetables and berries a video instruction on how to use these fruits, vegetables and berries and their advertising will be added.

Web site: **http://fruitonline.ge/eng-cat-all-detail-1-info-1-id-145.html**

---

[3] – Project] Conclusion: 3) – Project

This web project has already been created, but it needs to be launched in the USA. Web portal - **www.fruitonline.ge** This is an innovative project that will help sell fruits, vegetables and berries through websites. Manufacturers and sellers of fruits, vegetables and berries will be able to register on the website and sell their products. This is a very important web project as it will help quickly sell products that also have a short shelf life and quickly deteriorate.

This is an innovative project. It is also possible to send a delicious food gift basket to loved ones, family members on the day of birth. This project is important because these products deteriorate quickly and the web portal will help sell these products very quickly.

This is a global project and meets the criterion -
The proposed endeavor has both substantial merit and national importance.
This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clauses:
Improving the U.S. economy (as it will be profitable for the USA);
Improving wages and working conditions of U.S. workers (it creates new jobs with improved conditions);
This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will create new jobs in the United States.

---

4) - Project.

The tourism industry in the United States.

I have created a web portal for selling tours and travel services: **www.travel24.ge**

I also want to implement a similar web portal for selling tours and travel services in the United States. On this web portal I want to collect all travel companies that operate in the United States.

They can use this web portal, through the control panel-add their offers on tours, upload information about their tours, which they sell, information about the direction, photographs, about the timing of the tour, about the tariffs and price of the tour, the type of tour, also comments from others, a video clip about the tour, and so on. I want a creative idea to be added - add a video clip about a specific tour so that the client can watch video clips about tours.

Customers would be able to buy tours and travel services in the United States. This idea is also creative because you can add video clips about the tour, so that you can see in detail what a person should see on the tour and what the program of the tour is.

For example: **http://travel24.ge/eng-cat-tours-detail-1-info-1-id-66.html**

Or: **http://travel24.ge/eng-cat-tours-detail-1-info-1-id-102.html**

There was also a complete list of travel companies in the United States - their offers, their contact information, and so on. Also offers car and transport rentals for travel and recreation in the USA.

---

[4] – Project] Conclusion: 4) – Project

The web portal: **www.travel24.ge** has already been created, but it still needs to be launched in the USA. One of the main destinations in the United States is tourism. But if you look at the tourist destination, it is now in decline due to

the corona virus pandemic. It is very important to help travel companies in the United States. They will be able to register on a web portal which should be launched in the USA. Travel companies will be able to post their proposals - travel packages in the United States that will contribute to the development of tourism in the United States.

It is necessary to enable travel companies to sell their tours to the United States through a web portal, where a tourist can choose and order the desired tour in the United States. This will bring profits to the US treasury, and will bring profit to travel companies in the US.

The web portal contains an innovative idea - to show new travel destinations in video format. If earlier the client could only see places in photographs, now it will be possible to see everything in video format. This is very important and innovative for the USA.

This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clauses: Improving the U.S. economy (as it will be profitable for the USA);

Improving wages and working conditions of U.S. workers (it creates new jobs with improved conditions);

This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will create new jobs in the United States.

Due to the pandemic, US consulates cannot issue tourist, business, and visitor visas, as the applicant must personally be interviewed at the US consulate.

The US government can create a more modern web portal where applicants for a US visa can register, fill out in the DS-160 system, pay the consular fee there using a debit /credit card (according to a bank receipt it is not convenient) and which will also allow the applicant to upload PDF file documents into the system, such as a certificate from work, a certificate of income, birth certificates, a certificate of real estate, a copy of a passport, country visas, stamps about visiting other countries.

By completing this visa application, it will be possible not to call the applicant for an interview (which is very convenient, or call when necessary) and issue visas. It is possible to use the Canadian, Australian or New Zealand method of issuing visas, or the method of issuing electronic visas for Australia and New Zealand.

This will ease the working conditions of consular workers and enable the acceptance of applications for US tourist visas. See - Young Scientist * International scientific journal «Young Scientist» №19 (361) May 2021 | Information technologies «The Role of Information Technologies in Creating the World of Electronic Visas»

Vladislav can draw up a detailed project to improve these visa services. Recommendations were given to the State of Israel. See these recommendations in this petition (Proposal / project / idea for improving border control of the State of Israel).

5) - Project.
I want to create a web project - an online jewelry store. So that the client can buy jewelry or order different jewelry at his/her own discretion.

[5] – Project] Conclusion: 5) – Project

An online jewelry store will drive profits in the United States. The innovative idea is that there is a desire to sell rare items that are made in different countries of the world and which are not yet sold in the United States.

For example (Georgian Enamel), URL: **https://en.wikipedia.org/wiki/Cloisonn**
https://www.facebook.com/EnamelArtSofiEtsadashvili/
https://www.youtube.com/watch?v=EtOSY82vN8Q
https://www.etsy.com/market/georgian_enamel

This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clause - Improving the U.S. economy (as it will be profitable for the USA).

6) - Project.

Transport web portal for transport companies and truck drivers. I would like to create a web portal where trucking companies, truck drivers and customers looking for transportation services in the USA can register.

Clients who need to transfer a certain cargo from one place to another place will make an application on the web portal and the application will contain the following information: the place from where the cargo is to be picked up, the place where the cargo should be brought, the type of cargo, weight of the cargo, dates, the amount that the client is ready to pay for the carriage of this cargo and other information.

The web portal will help customers to make a request that they want transportation services, and a transportation company or a truck driver who is satisfied with the terms of the offer can offer their transportation services to the customer.

The client, the truck driver and the transport company will cooperate with each other via the web portal.

[6) – Project] Conclusion: 6) – Project

This is a large-scale project to improve transportation services, which will be very beneficial for the United States, as it will ease the working conditions of drivers. Also, this project is innovative, it will allow companies to receive orders and make a profit, which will lead to an improvement in the US economy.

The number of customers of this project will increase, which will lead to the need for a new workforce in the United States, new jobs in the United States will be needed. The project is very beneficial and necessary for the United States. This is an innovative project.

This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clauses: Improving the U.S. economy (as it will be profitable for the USA);
Improving wages and working conditions of U.S. workers (it creates new jobs with improved conditions);
This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will create new jobs in the United States.

---

7) - Project.

In the USA, many people often move from one place to another place to live. They carry their belongings and furniture. I want to create a web portal where people who want to move their belongings and furniture from one place to another will register.

With the help of the web portal, they will be able to indicate the address from where they need to pick up things and furniture and the place where they need to transport these things and the address.

After this offer for transportation, the companies that are engaged in transportation will offer their services to this client and indicate the cost of their services. The client will choose a more acceptable company that deals with transportation.

The service will be very convenient and creative for both the client and the company that deals with transportation.

I work a lot and have a lot of experience in the field of information technology and the web.

I want to work in the USA and be useful to the USA. I have a lot of new creative ideas in the field of information technology and the web. I live in Georgia, a small country with a population of 3 million.

USA is the most advanced country in the field of information technology and the web, I want to continue to work and develop in the field of information technology and the web in the USA.

[7) – Project] Conclusion: 7) – Project

This is a large-scale project to improve furniture transport services. It is very common for US citizens to move to different cities and regions. The web project is very important as it allows them to save time and money for these services. Companies that are engaged in transportation will be able to make profits and revenues, thereby paying taxes and replenishing the US treasury. Every year orders will increase and new labor will be needed, which will increase the demand for labor and new jobs will be needed. The project service will improve communication between the customer and the contractor, and therefore the project also has innovative motivations.

Vladislav's company, which will create all these projects and then support them, will receive a certain percentage of completed orders, which will raise the company financially, the company will receive large income, will pay taxes, will

improve working conditions, and will create new jobs in the USA, as after the expansion, more and more new employees will be needed. This is an innovative project.

This project meets the criterion (The proposed endeavor has both substantial merit and national importance) and its clauses:
Improving the U.S. economy (as it will be profitable for the USA);
Improving wages and working conditions of U.S. workers(it creates new jobs with improved conditions);

This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will create new jobs in the United States.

Section 2 [2]. Mr. Vladislav Gurabanidze work will ultimately benefit the United States.

See **Section 2 [1];**
This project will bring income and profits from the United States, tax on profits will be paid to the US treasury, and will create new jobs in the United States.

Section 2 [3]. Additional information:

Vladislav Gurabanidze has Digital identity card of Republic of Estonia (it is not citizenship), this card for business people in Europe.

Vladislav Gurabanidze has many certificates and diplomas:

- 2015 year: Programming languages: C#, ASP.NET, MSSQL, PHP individual courses, Web Front-end Developer;

- 2012 year: Ukrainian language training courses - Cultural and Information Center of the Embassy of Ukraine in Georgia, Certificate of Knowledge of the Ukrainian Language;

- 2012 year: Training courses in the Orthodox catechism of the old and new testaments (bible) - Davitianni Movement under the Patriarchate of Georgia, Certificate;

- 2001 year: Computer courses - Georgia-Japan Friendship Society «Amomavali Mze – Rising SUN», Centre of computer mathematics and programming, course: Web-design, HTML and Javascript 1.2;

- 2001 year: Computer courses - Training center at GPI, Tbilisi, Programming language - Visual Basic;

- 2000 year: Computer courses - Computer School "Algo", Tbilisi, Windows 2000, MS Word 2000, MS Excel;

- 2000 year: PageMaker 6.5, PhotoShop 5.0, CorelDraw 9.0, Internet;

- 2015: Certificate - certifications.ru, PC User

- 2007 year: Certificates of the National Internet Contest - 2007, Company "Magticom", Tbilisi, National Internet Competition;

- 2007 year: Winner Diploma of the National Internet Contest - 2007, Company "Magticom", Tbilisi, Winner of the National Internet Contest;

- 2006 year: National Internet Competition - Certificate - 2006, Company "Magticom", Tbilisi, National Internet Competition;

- 2002 year: Specialist certificate - www.specialist.ru, ID: 123555, BMSTU, Moscow, Internet User;

- 2002 year: Specialist certificate - www.specialist.ru, BMSTU, Moscow, HTML Specialist;

- 2002 year: Brainbench certificate - www.brainbench.com, USA, Written Russian;

- 2002 year: Brainbench certificate - www.brainbench.com, USA, Adobe Photoshop 5.5;

- 2002 year: Brainbench certificate - www.brainbench.com, USA, HTML 3.2;

- 2002 year: Brainbench certificate - www.brainbench.com, USA, Javascript;

- 2002 year: Brainbench certificate - www.brainbench.com, USA, MS Windows 2000 Fundamentals;

- 2001 year: Certificate - Georgia-Japan Friendship Society «Amomavali Mze – Rising SUN», Centre of computer mathematics and programming, course: Web-design, HTML and Javascript 1.2;

Section 3. Conclusions

To conclude, the evidence presented in **Sections 1 and 2 demonstrates** that **Mr. Vladislav Gurabanidze** satisfies the following 9 criteria qualifying him as an alien of extraordinary ability in **science**:

(i) - **Mr. Vladislav Gurabanidze** has received internationally recognized prizes and awards (certificates and diploma) for excellence in the Web/IT.

(ii) - **Mr. Vladislav Gurabanidze** is member of many professional IT associations;

(iii) - Major media has been published materials about **Mr. Vladislav Gurabanidze**

(iv) – N/A, None;

(v) - **Mr. Vladislav Gurabanidze** of great importance to the science (Computer science, IT, Web, E-commerce, E-business);

(vi) **Mr. Vladislav Gurabanidze** is a co-author of multiple scholarly articles in IT that are published in major professional journals;

(vii) - **Mr. Vladislav Gurabanidze** work (web projects, web design) has been displayed at artistic exhibitions or showcases.

(viii) - **Mr. Vladislav Gurabanidze** has performed in a critical role for organizations that have a distinguished reputation;

(ix) - **Mr. Vladislav Gurabanidze** command a high salary remuneration in relation to others in the field;

(x) - **Mr. Vladislav Gurabanidze** had (or/and) has commercial successes in the performing arts.

In addition to being a well-recognized and top expert in the scientific field of IT/Web/Computer with over 20 years of experience, **Mr. Vladislav Gurabanidze** is continuing to work on scientific problems of a great importance to his field and his work has already substantially benefited work. He has been considered irreplaceable in the collaborative projects in the area of developing new software for preservation and popularization of the heritage.

Thus, **Mr. Vladislav Gurabanidze** fully satisfies all requirements and regulations listed in INA Section 203(b)(1)(A) and 8 CFR Section 204.5(h). Considering the evidence presented in this petition and in the attached exhibits, I ask the reviewer to kindly approve **Mr. Vladislav Gurabanidze**'s petition for the permanent residence under the category of an alien of extraordinary ability.

Statement of Beneficiary on Work Plans in the United States
My useful ideas of IT and Web projects for the United States of America

Dated: 29 May 2021

My name is Vladislav Gurabanidze. I am the beneficiary of the petition for the permanent residence. I already have a huge record of accomplishments, and I plan to continue my career in this field in the United States. I plan to continue my career in the USA and will work in science (field: Computer Science), industry: Information Technology (IT) and Web technology. I-140 -> Part 6. Basic Information About the Proposed Employment: 1. Job title: Web

Developer, IT Director of IT/Web Company; 2. Soc code: 15-1250, (Software and Web Developers, Programmers); 3. Nontechnical Job Description: Develop and implement useful and creative commercial IT, web projects, websites and mobile applications.

I want to work in information technology in the USA and do many useful projects for the USA.

I want to develop information technology in the United States and work in the field of information technology and create creative projects, web projects and mobile applications.

My Facebook page: **https://www.facebook.com/vlad.gurabanidze/**

My LinkedIn page: **https://www.linkedin.com/in/vladislav-gurabanidze-85b541175/**

My Instagram page: **https://www.instagram.com/vgurabanidze/**

I have an idea to open an IT company in the USA and make useful IT/Web projects.

1) - Project.
We want to create a mobile application that will facilitate ordering food in restaurants in the United States.
People will install the application on their mobile phones and come to a restaurant. In the restaurant, there will be a QR code on the tables, it will scan the QR code on the table and the restaurant menu will open in the mobile application.
The person will select the type of food, quantity and pay the cost of the food (or split the payment with friends) using a credit card and place an order for food. It is necessary to add a creative function of payment to order by several clients, for example - five friends came to a restaurant, ordered food for 150 USD, there should be a function that divides the amount by 5 people and each pay 30 USD via a mobile application.
When the restaurant receives the order, it will place the order and bring it to the client. The client does not have to call the waiter; the restaurant client can read in detail the information about the food / dish that he/she orders - the description, the number of calories, photos, videos, ingredients of the dish and reviews from other customers.
The client can also place an order before arriving at the restaurant, book a table, pay for the order and indicate the time when he/she will come to the restaurant. Also, the person will turn on the function through which see online how his/her ordered dish is being prepared.

2) - Project.
I created a web project (Real estate - buy, sale, rent): **www.makler24.ge**
Web site: **http://makler24.ge/eng-cat-all-type-0-stype-0-page-1.html**
I want to create a similar web portal (USA real estate website, rent, buy and sell) in the USA.
My creative idea is that I want to add a function to the site - viewing real estate videos. There are a lot of photos on similar sites, but no real estate videos.
The client cannot see in detail how the rooms and the courtyard are located, with the video he/she will receive full information, he/she will be able to add many videos to the site, for example, as on my site YouTube video:
http://makler24.ge/eng-cat-all-detail-1-info-1-id-116.html
There are also 3D photos, I want to add 3D photos to the site (you can look left, right, up and down in the room and move around the room). The 3D photo will show in detail the rooms and the yard of the property, the client will be able to walk around the house virtually online and view the property.

3) - Project.
I have created a web portal - selling fruits, vegetables and berries online: **www.fruitonline.ge**
I want to implement this web portal in America so that customers can buy fruits, vegetables and berries using the website. I want to integrate fruit and vegetable stores into this system so that the client can buy fruits, vegetables and berries using the website and mobile application.
The client will order fruits, vegetables and berries using the website and then, within a certain time, he/she will be delivered home the order - fruits, vegetables and berries. There will also be baskets of fruits.
The clients will be able to choose a basket of beautiful fruits and give, for example, to their loved ones - a girlfriend, parents or others, make them an edible and beautiful gift.
On the site selling fruits, vegetables and berries a video instruction on how to use these fruits, vegetables and berries and their advertising will be added.
Web site: **http://fruitonline.ge/eng-cat-all-detail-1-info-1-id-145.html**

4) - Project.

The tourism industry in the United States.

I have created a web portal for selling tours and travel services: **www.travel24.ge**

I also want to implement a similar web portal for selling tours and travel services in the United States. On this web portal I want to collect all travel companies that operate in the United States.

They can use this web portal, through the control panel-add their offers on tours, upload information about their tours, which they sell, information about the direction, photographs, about the timing of the tour, about the tariffs and price of the tour, the type of tour, also comments from others, a video clip about the tour, and so on. I want a creative idea to be added - add a video clip about a specific tour so that the client can watch video clips about tours.

Customers would be able to buy tours and travel services in the United States. This idea is also creative because you can add video clips about the tour, so that you can see in detail what a person should see on the tour and what the program of the tour is.

For example: **http://travel24.ge/eng-cat-tours-detail-1-info-1-id-66.html**

Or: **http://travel24.ge/eng-cat-tours-detail-1-info-1-id-102.html**

There was also a complete list of travel companies in the United States - their offers, their contact information, and so on. Also offers car and transport rentals for travel and recreation in the USA.

5) - Project.

I want to create a web project - an online jewelry store. So that the client can buy jewelry or order different jewelry at his/her own discretion.

6) - Project.

Transport web portal for transport companies and truck drivers. I would like to create a web portal where trucking companies, truck drivers and customers looking for transportation services in the USA can register.

Clients who need to transfer a certain cargo from one place to another place will make an application on the web portal and the application will contain the following information: the place from where the cargo is to be picked up, the place where the cargo should be brought, the type of cargo, weight of the cargo, dates, the amount that the client is ready to pay for the carriage of this cargo and other information.

The web portal will help customers to make a request that they want transportation services, and a transportation company or a truck driver who is satisfied with the terms of the offer can offer their transportation services to the customer.

The client, the truck driver and the transport company will cooperate with each other via the web portal.

7) - Project.

In the USA, many people often move from one place to another place to live. They carry their belongings and furniture. I want to create a web portal where people who want to move their belongings and furniture from one place to another will register.

With the help of the web portal, they will be able to indicate the address from where they need to pick up things and furniture and the place where they need to transport these things and the address.

After this offer for transportation, the companies that are engaged in transportation will offer their services to this client and indicate the cost of their services. The client will choose a more acceptable company that deals with transportation.

The service will be very convenient and creative for both the client and the company that deals with transportation.

I work a lot and have a lot of experience in the field of information technology and the web.

I want to work in the USA and be useful to the USA. I have a lot of new creative ideas in the field of information technology and the web. I live in Georgia, a small country with a population of 3 million.

USA is the most advanced country in the field of information technology and the web, I want to continue to work and develop in the field of information technology and the web in the USA.

I want to use my skills, creativity, experience and talent in the USA.

Getting the permanent residence in the United States will increase my opportunities. For example, many grants and fellowships are restricted to the U.S. citizens and permanent residents. I will be able to attend international conferences in my field outside the United States without worrying about getting a new visa stamp.

I will be very grateful if I am given a chance to benefit the U.S. science and economy.

Regards,
Vladislav Gurabanidze

---

See evidence: He was accepted into the organization for his high achievements. Not everyone can become a member of the organization. See letter (Email letter) - (Please see **exhibit 26**);

Scientific Cyber Security Association actively works on both Georgian and international scientific projects. It actively cooperates with foreign experts.

Cooperation is being held not only with concrete scientists but also with organizations, the clear example of it is the cooperation with one of the largest universities in Ukraine – Taras Shevchenko Kiev National University. Besides of many conferences, a joint scientific journal was issued with the above mentioned institution; Polish Technical Academy is also involved into the recruitment and development of the journal.

link: https://e-estonia.com/solutions/e-identity/e-residency/
link 2: https://en.wikipedia.org/wiki/E-Residency_of_Estonia

Vladislav Gurabanidze was accepted into the organization for his high achievements. Not everyone can become a member of the organization.
See link: https://e-estonia.com/solutions/e-identity/e-residency/
See link 2: https://en.wikipedia.org/wiki/E-Residency_of_Estonia
Information:
e-Residency of Estonia (also called virtual residency or E-residency) is a program launched by Estonia on 1 December 2014. The program allows non-Estonians access to Estonian services such as company formation, banking, payment processing, and taxation. The program gives the e-resident a smart card which they can use to sign documents. The program is aimed towards location-independent entrepreneurs such as software developers and writers. The first e-resident of Estonia was British journalist Edward Lucas; the first person to apply for and be granted e-residency through the standard process was Hamid Tahsildoost from the United States.

An application for e-residency can be made online by filling in a form, supplying a scan of a national passport and a photograph, and giving the reason for applying (which does not strongly affect the outcome of the application). Kaspar Korjus, former managing director of the e-residency program, said that applicants who had been involved in financial misbehaviour such as money laundering would be rejected. Successful applicants would be invited to an interview in Tallinn or an Estonian embassy about three months after applying, and would then, if successful, be issued with their card. The certificates of the document are valid for five years, up from three years when the program was first announced. After that period, if a person wishes to continue using e-services, they have to apply for a new document. The application process will be the same as when they first applied. A state fee needs to be paid again when they submit a new application.

Exhibit 60: Vlad is short name of Vladislav,

In Russian, **Vlad** doesn't constitute a separate name but it is a short (affectionate) form of several Russian masculine names, such as Vladimir, **Vladislav**, Vladlen, Vsevolod, etc.

Vladimir is of Slavic etymology, it is a compound word consisted of two roots: vlad which means "to possess, manage, rule, control, own, etc" and mir which is for "world, community, all people; peace".
